

# COMPANY PROFILE

# Welcome to TAB!

The transportation market today is complex and challenging. The increasing need for cutting edge technology, challenging governmental regulations, as well as driver and fuel uncertainties, have made this era in transportation more complex and challenging than ever before! With the industry in its current state, many companies are resorting to outsourcing in order to keep the cost associated with effectively utilizing the best transportation mode, responding to market fluctuations, and accurately tracking the product, at a minimum. At TAB we are more than just a third-party Supply Chain Management company. We have the logistics experience and network needed to not only save your company money, but also decrease delivery times, improve customer service, and create logistic efficiencies.

We start by gaining an understanding of your company's current operation. We then create a customized solution for your specific needs, including inbound and outbound freight management, freight consolidation, distribution, and warehousing. Using the latest technologies, our own private fleet, and our vast partner carrier network, we seamlessly respond to your market demands and disruptions. We can even provide onsite personnel to work closely with your management and procurement teams.

Let our knowledge, network, and technology take your management system to the next level!

# Single Source Supply Chain Management

Single sourcing comes with many benefits that can help your company improve its logistics management operations. Some of the many benefits of single source freight management programs and services include:

- **Transportation Management System** - The use of our comprehensive Transportation Management System (TMS) along with the guidance of our experienced personnel are key aspects of our single sourcing programs. With these in hand, we design and manage programs to control costs and help improve service to your customers.
- **Single Point of Contact** - Having a single point of contact takes the confusion out of logistics management. One call resolution is a huge time saver for your staff. Your company can rest easy in the knowledge that TAB will do what it takes to get the job done!
- **Inbound and Outbound Programs** - With single sourcing, controlling and managing inbound and outbound becomes a much simpler task.
- **Dynamic routing and Cost Management** - You avoid costly investments in software and can utilize those funds for capital improvements or to boost the bottom line.
- **Integrated Optimization Technology** - We use advanced technology designed to create maximum efficiency for your company's logistics management that is strengthened by the simplicity offered by single sourcing.
- **Shipment Track and Trace** - We track and trace your company's shipments from pickup through delivery to avoid any unpleasant surprises.
- **Freight Payment and Auditing** - All invoicing and auditing of freight bills is included in our single source management programs. We have an open-book policy of all freight billing to satisfy any accounting concerns or requirements.

Call us at 314-714-3408 to find out more about our single source solutions!

# Intermodal/Rail

TAB's intermodal program offers customers the option to save money with smart alternatives to standard over the road transport. Using our rail and intermodal services will provide your company with substantial advantages both economically and environmentally, while addressing the freight density goals of your supply chain strategy. In fact, a recent study conducted by the EPA, intermodal transportation was found to cut fuel use and greenhouse effect by 65% over 1000 miles when compared to over the road miles.

We have facilitated partnerships with rail lines across the country, which grants our customers the opportunity to transport their goods both efficiently and more cost-effectively. We will work to create the integrated 3<sup>rd</sup> Party logistics solution that addresses your company's requirements perfectly.

Regardless of your company's intermodal needs, TAB's centralized operations offer a one call service. Our industry professionals can solve your transportation problems with customized intermodal transportation solutions.

# Consulting Services

The TAB global transportation team includes sector experts who have over 100 years of combined experience working with transportation related topics. We have worked or consulted on all aspects of the transportation spectrum from Inbound transportation (raw materials or finished goods) to your plant or Distribution center, to the shuttling of finished goods from the plants to the D.C.'s, to the delivery of the finished goods from the D.C. network to your customers.

Our clients have access to our professionals who are focused exclusively on the trends and emerging challenges facing the industry, have a broad network of relationships with key influencers, and provide turnaround, restructuring, performance improvement and communications counsel based on in-depth industry knowledge and expertise. Our comprehensive suite of services includes:

- Corporate Communications
- Financial Communications
- Creative Engagement
- Performance improvement
- Strategy consulting and research

# Inbound Freight Management

- All too often shippers do not make inbound freight a supply chain priority. Managing and controlling inbound freight effectively is a difficult process and can sometimes pit various departments within an organization against each other. Changing inbound freight flow can also affect agreements with the shipper, receiver, or both. These are the challenges that TAB overcomes daily. Transportation accounts for almost 50% of an average company's logistics costs. By choosing to make inbound freight a priority, shippers can gain more control of these costs.
- By adding TAB's Inbound Freight Management program to your transportation strategy, you will see results like:
  - Better inventory managements
  - Lower inventory levels
  - Reduced carrying costs

# Dedicated On-Site Management Services

TAB's on-site freight management programs are customized to fit your unique needs. Our on-site professionals continuously strive to understand your specific needs and future vision. We are a family of the finest and most qualified transportation professionals. We are industry leaders whose goal is to exceed our customers' expectations in service, delivery and cost through continuous improvements. Our on-site management team works hand in hand with your team for seamless integration of our services from raw materials to point of sale. We abide by your employee rules and are very hard to distinguish from your own staff by design. We can easily supplement our staff to align with the ebbs and flows of your business. We are dependable and flexible making for an easy partnership. We become partners in progress, constantly driving towards a leaner and more efficient supply chain that generate higher margins. We deliver solutions.
